

HOW CAN WE OPPOSE MOSQUES BEING BUILT IN OUR COMMUNITY?

As far as opposing the erection of a mosque or madrassa, in your community, there is an excellent book written on that by Pamela Geller. On Facebook you can find [Stop Islamisation of America](#) and [Stop Islamisation of Nations](#)

You will also be able to find their website and she has listed a whole step-by-step strategy on how to resist the Islamisation of our suburbs and particularly, objective, factual details on the politicisation of mosques and madrassas and their role in fermenting terrorism, human trafficking, etc.

Some of the issues she raised, from the top of my head, (I do not have the book in front of me right now), include:

Requesting details of what foreign funding is coming for this project. Frequently the Saudi Arabian government, and sometimes the Iranian government, are funding mosques.

Investigating the organisations which are helping to sponsor the mosque project often reveals that, even on their own websites and Facebook pages, they are extremely radical, anti-Israel, pro Al-Qaeda, Hezbollah, Hamas and Muslim Brotherhood, supporting terrorist groups overseas and making incredibly intolerant and abusive statements, and even threats, against Jews and Christians.

A simple web search and Facebook page search of some of the individuals and organisations behind the local mosque would unveil some surprising and shocking facts which can change local ratepayers perceptions.

Also Robert Spencer has written a number of excellent books exposing how Islamisation works and how to resist it.

Traditionally when Muslims set up mosques they ignore the building codes that were agreed on and, if they are forced to, will pay the fine, but do not demolish the code violation minarets, etc. This has been found time and again in, for example, the mosques in Berlin and in Paris, etc.

Many mosques and madrassas become centres for radicalisation and intimidation of the local community.

So much so that there is apparently no community in Denmark that has been willing to have a mosque set up in their area yet.

May God continue to be your strength and shield.

Yours for Faith and freedom
